## Verbal Reasoning Demo Paper

This is a multiple choice test.

The paper contains different types of question. Each question type starts with a description of what to do, followed by a worked example and solution with the answer marked on the answer sheet.

Some questions require more than one answer to be marked.

Answers should be marked on the answer sheet provided.

Use a pencil to mark your answer in the column that has the same number as the test question by drawing a firm horizontal line through the rectangle next to your answer.

If you make a mistake, rub it out and put in your new answer. You should only mark one answer for each question.

If you cannot do a question, do not waste time, move onto the next question. If you are not sure of an answer, you should make a guess.

There are 32 questions and you have 25 minutes to do the test.

In this question, one letter can be moved from the first word to the second word to make two new words.

The letters must **not** otherwise be rearranged and **both** new words must make sense.

Find the letter that moves and mark it on the answer sheet.
